Education

Vellore Institute of Technology, Chennai

July 2024 – July 2028

Bachelor of Technology in Computer Science Engineering

CGPA: 8.8

Relevant Coursework

Data Structures • Algorithms • Operating Systems • Concurrency & Synchronization • Data Management • Computer Networks • Object Oriented Programming • Theory of Computation • Computer Architecture

Experience

VIT Chennai

May 2026 – Present

Research Intern

Remote

- Architecting an end-to-end real-time machine learning system to mitigate phishing attacks by engineering a concurrent Google Chrome extension that asynchronously intercepts live web traffic.

IBM

May 2026 – July 2026

DevOps Engineer Intern

Remote

- Engineering automated CI/CD pipelines to streamline deployment velocity, optimizing cloud infrastructure and resource allocation for high-availability production environments.

Oracle Academy

May 2025 – August 2025

Software Engineering Apprentice (Java Foundations)

Remote

- Completed an intensive, project-driven software development track focused on Object-Oriented Programming (OOP) patterns, data structure efficiency, polymorphic inheritance, and robust compiler exception-handling architectures.

Projects

Mirra AI Companion | *Groq Cloud API, FastAPI, Google OAuth 2.0*

February 2026 – June 2026

- Architected an asynchronous streaming backend interfacing directly with Groq Cloud inference clusters to compute and serve high-throughput text generations from Llama models while reducing round-trip API network overhead by 35%.
- Integrated Google Cloud OAuth 2.0 credential handshakes to establish zero-trust client session handling and protect cross-origin server endpoints from unverified connection requests.

Lead Track SaaS Platform | *Next.js, Supabase, TypeScript, Tailwind CSS*

May 2026

- Engineered an asynchronous file parsing pipeline using the XLSX library to ingest, validate, and batch-insert enterprise datasets up to 50MB, increasing processing efficiency by 40%.
- Secured user-data isolation at the database layer via strict Supabase Row Level Security (RLS) policies paired with custom B-Tree indexes to sustain rapid execution speeds.

Campboard | *MongoDB, Express.js, React.js, Node.js*

January 2025 – July 2025

- Designed a full-stack campus bulletin board application using the MERN stack to enable user authentication, secure community post creation, and real-time resource sharing boards
- Implemented localized search routing indices that compressed overall document querying latency down to a sub-200ms window, significantly reducing web server workload during peak traffic times.

Licenses & Certifications

Google UX Design Professional Certificate: Validated foundational user experience strategy, wireframing architectures, user research matrices, and high-fidelity interactive prototyping models within Figma.

Cisco Networking Academy: Completed comprehensive training in protocol routing frameworks and system architectures via Cisco Packet Tracer.

Python Essentials 1: Achieved foundational systems certification in algorithm flow architecture and parsing rules.

Google Developers Group (GDG): Solution Challenge Certificate of Achievement and official badge verification (July 2025).

Technical Skills

Languages: Java, Python, C++, JavaScript, C, SQL

Backend & Cloud: Node.js, Next.js, FastAPI, Express.js, Supabase, Microsoft Azure, Vercel, RESTful APIs

Databases & Systems: MongoDB, Relational Databases, Multi-threading & Synchronization (OS), Cisco Packet Tracer

Frontend & Tools: React.js, Tailwind CSS, HTML5/CSS3, Git/GitHub, CI/CD, Figma

Leadership / Extracurricular

Tech Researchers Club, VIT Chennai

July 2025 – Present

General Secretary (Web Dev Team Member: Jul '25 – Jun '26)

Chennai, Tamil Nadu

- Progressed from Web Dev Team Member to General Secretary, architecting internal deployment platforms while managing end-to-end technical lifecycles for student engineering cohorts.

Student Welfare Council, VIT Chennai

September 2025 – Present

Core Committee Member (Volunteer: Sep '25 – Jan '26)

Chennai, Tamil Nadu

- Coordinated high-stakes backstage logistics, itinerary tracking, and security handshakes for 8 artist groups, including headline acts Raftaar and MSL, across a 4-day cultural festival.
